TASKI® The ULTIMATE Cleaning Machines

TASKI® AERO UP

AERO UP is a light weight lithium powered upright vacuum for the professional market harnessing the latest in both lithium battery and digital motor technology. Suitable for both carpets and hard floors.

TASKI® AERO UP brings you:

- Light, quiet & discreet
- Total flexibility
- No compromise
- Reduce your total cost to clean
- Energy efficient & sustainable

Total flexibility

Perfect for day time cleaning or spot cleaning without the need to schedule around the public or building users. With multiple power modes new levels of autonomy can be achieved. With a magical 1 hour run time and quick battery change, battery constraints are a thing of the past. The TASKI AERO UP is designed to work with the TASKI Trolley system. Store the vacuum, store spare batteries and even charge on the go. The TASKI AERO UP utilises the same battery & charger used with the TASKI AERO BP backpack and TASKI swingo 150b scrubber drier for increased synergies and flexibility.

No compromise

A simple and easy to use release system enables quick interchange from power head for carpets to floor tool for hard floors. For the ultimate deep clean chose the brush driven power head which makes light work of cleaning carpets. The super lightweight floor tool glides over hard floors for effortless cleaning. Pick the best option to meet your needs or order both for no compromises.

Reduce your total cost to clean

Upright vacuums are well known to have good ergonomics and high productivity for a lower cost to clean. TASKI AERO UP can also be incorporated within the TASKI Trolley system to help reduce unproductive time lost between cleaning cupboards. Using less than half the energy of a traditional motor, no maintenance and a limitless life, TASKI AERO UP's digital motor will significantly reduce the total cost of ownership of an upright vacuum. Less energy costs, little or no maintenance costs and long life make the TASKI UP a major step up in vacuums.

Energy efficient & sustainable

TASKI is unique in using a smaller super-efficient digital brushless motor that uses typically 50% less energy. Brushless motors need no maintenance and should never need to be replaced. Longevity being the ultimate in sustainability.

TASKI® AERO UP

Technical data	TASKI AERO UP
Vacuum motor (W)	340
Battery (type)	Lithium
Power settings	Low / medium / high
Airflow (L)	29 / 34 / 40
Run time (minutes)	60 / 50 / 40
Recharge time (hours)	1.5
Weight (RTU with battery)	5
Sound level (dbA)	62 / 63 / 65
Filter bag capacity (L)	3
EPA H11 Filter	Standard
HEPA H13 Filter	Optional
Exhaust filter	Yes
Working width (mm)	290 / 300 (optional power brush head)
Insulation class	II
Approvals	CE
Dimensions WxLxH (mm)	290 x 180 x 1230
